

"The shortest path to improved marketing effectiveness, improved lead volume, increased conversion rate and low attrition is via marketing and sales data management." - Glenn Coward / Founder CS

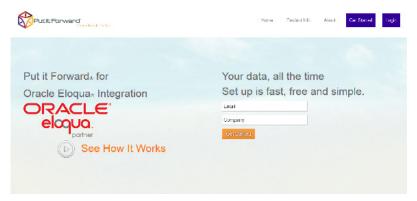

Get Social - Get Deeper Insights

Put it Forward® is the solution that Oracle Eloqua® users look to deepen their relationships through Facebook®. This lets a user generate higher brand resonance while deepening their understanding and manage relationships throughout an integrated campaign across their business processes.

Common Scenarios:

- Track Facebook® user status and page updates as they are posted.
- Deepen your understanding of trends through aggregated keyword analysis on top of Facebook® posts.
- Determine the effectiveness of your pages by seeing if your contacts like a page.
- Find new influencer's for your product or service by seeing if two people are friends
- Target content for publication through scheduling. Back date it as well.
- Localize your content and discussions to have personalized exchanges.
- Freshen your content systematically through automated postings.

Eloqua® and Facebook® Simplified

Put it Forward® enables the rapid connection and collaboration of business systems through on demand technology.

Designed for the marketing analyst, evangelist or operations specialist, Put it Forward's® "No Code" graphical experience accelerates and simplifies the ability to work with data.

Extend beyond connecting into operations governance, data quality and customer life cycle management. All within the same application.

Pre-Built Connections from Put it Forward® enable Oracle Eloqua® users to rapidly connect to other systems such as Twitter®, Salesforce®, SAP®, Microsoft Dynamics®, Netsuite® and many more. Helping improve operations, increase data quality and minimize IT costs while enabling their goal of having a deeper more meaningful customer experience.
