

“Put it Forward gives me the capabilities to manage data for a better business and better products”
 Udo Waibel - CTO Front Range

Better Projects + Better Sales and Service

Put it Forward® is the solution that Sharepoint® users look to for help in running effective projects through Workfront®. This lets a user keep both project managers, sales and service in the conversation and sharpen targeted execution across the enterprise.

Common Scenarios:

- Sync project control in Workfront® with sales and delivery in Sharepoint®
- Auto-create projects when a sale closes or service requests are created
- Get project performance roll up
- Centralized activity management across processes and projects
- Auto-create projects
- Enhance forecasting models and reporting with deeper views of your team tasks
- Native integration with Salesforce
- Fully configurable task, project, opportunity and account information mapping

Workfront® and Sharepoint® Simplified

Put it Forward® enables the rapid connection and collaboration of business systems through on demand technology.

Designed for the analyst, evangelist or operations specialist, Put it Forward's® “No Code” graphical experience accelerates and simplifies the ability to work with data.

Extend beyond connecting into operations governance, data quality and customer life cycle management. All within the same application.

Pre-Built Connections from Put it Forward® enable Workfront® users to rapidly connect to other systems such as Oracle Marketing®, TFS®, Salesforce®, SAP®, Microsoft Dynamics®, Netsuite® and many more. Helping improve operations, increase data quality and minimize IT costs while enabling their goal of having a deeper more meaningful customer
